

Year 1 Summer Term

For our final term in year 1 we have been learning about our country and the United Kingdom. We have looked at aerial views and explored Google Earth.

For our trip, we visited Souter Lighthouse in Sunderland. This involved climbing to the top of the lighthouse, looking around the Lighthouse Keepers Cottage and time to play on the beach.

In Science we have enjoyed exploring the weather. We have learnt about the changing seasons and explored the sun, wind and rain.

In DT we designed sandwiches to make and sell for a profit.

We talked about how much it would cost to make them and how much we should sell them for. We used our Design skills to create a sandwich and a poster to advertise it. Afterwards we ate our sandwiches together.

A big part of our PE this term was practising for sports day, which was a huge success and enjoyed by all!
