

World of this

This term we have enjoyed learning about Space through Science, DT and even French!

We designed and planned our rocket. We created a collage rocket first then had lots of fun making our rocket out of junk materials.

Lots of us made rockets at home to add to our display in school about The Red Planet. We had lots of fun writing non-chronological reports about Mars.

We had lots of fun making paper aeroplanes and launching them across the hall. This made us think about aerodynamics when designing our rocket so that our rocket would fly through the atmosphere.

Here we are learning and ordering the planets-in French. Mrs McGeary has spotted some fabulous French accents.
