

Year 1 Spring Term

This term we have been learning all about Seasons and the changes that happen during Winter time. We have observed snow and ice, looking closely at how winter compares with other seasons across the year.

In History we have enjoyed learning about kings and queens from our past as well as the local Prince Bishops. We invited the Auckland Project in to school who created a Pop up Palace in our classroom!

We heard stories from the past and held precious objects that were hundreds of years old.

In maths we have learnt about even and odd numbers and practiced halving shapes and quantities.

In PE we have performed dances, using the weather as a stimulus.
