

Water Water Everywhere!

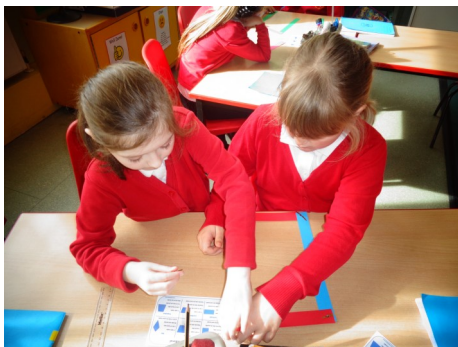

Year 4 Spring 2018

This term we have really enjoyed learning all about water. We have learnt lots about the water cycle and how important it is to us.

We have learnt about the different types of clouds and had a great time investigating the different types we could see each day.

In Science we have been learning about States of Matter. We had a great time being scientists investigating whether gas had a mass.

In Maths we have been investigating how quadrilaterals are made.
