

Year 4 - Spring 1st Half Term 2022

Surviving the Prehistoric Age

The children in Year 4 were learning about life in the Stone Age, Bronze Age and the Iron Age as their topic this half term. They learnt

lots of new and interesting facts about life at that time. The children recreated cave

art, by painting onto sandpaper and using stencils to create images of the different types of animals believed to be there at that time.

The children also were fascinated to learn about Stonehenge. They had great fun trying to re-

create it using biscuits.

In Science we investigated what happens to your food when we digest it. We learnt lots about digestion during our science lessons!
